Interstepcom LTD

PROJECT BACKGROUND

Interstepcom LTD is a well-known company in the Cahul region, whose core activity is manufacturing furniture. In its manufacturing activity, the company places a great emphasis on identifying sources of pollution and their impact on the environment. The company uses quality and robust materials, which can last for a long time. Its high-quality production and individual approach to each customer mark the company out from its competitors on the domestic market.

The company displays a wide range of products in its furniture showroom, which vary in regard to both design and price. Its production capacity is approximately 24,000 items annually. The company aims to achieve flexibility in its production process by purchasing energy-efficient equipment.

Portfolio of Investment Opportunities

4

The company is established in the city of Cahul. The main indicators for its geographic location are as follows:

- 20 km by land from the EU border (Romania).
- 19.5 km by land from Giurgiulesti Port.
- 203 km by land from Chisinau International Airport.
- Access to the national road network.
- Access to the railway network.

Ownership	Bajenov Sergiu – 100%
Main activity	Furniture production
Employees	71

ACTIVITY

Total land	N/A
Main production	Manufacturing furniture
Production capacity	24,000 articles yearly
Target market	Moldova, Romania

INFRASTRUCTURE

Equipment	• Furniture production line (eight units)
Spaces	Industrial buildings - 1 500 m ²

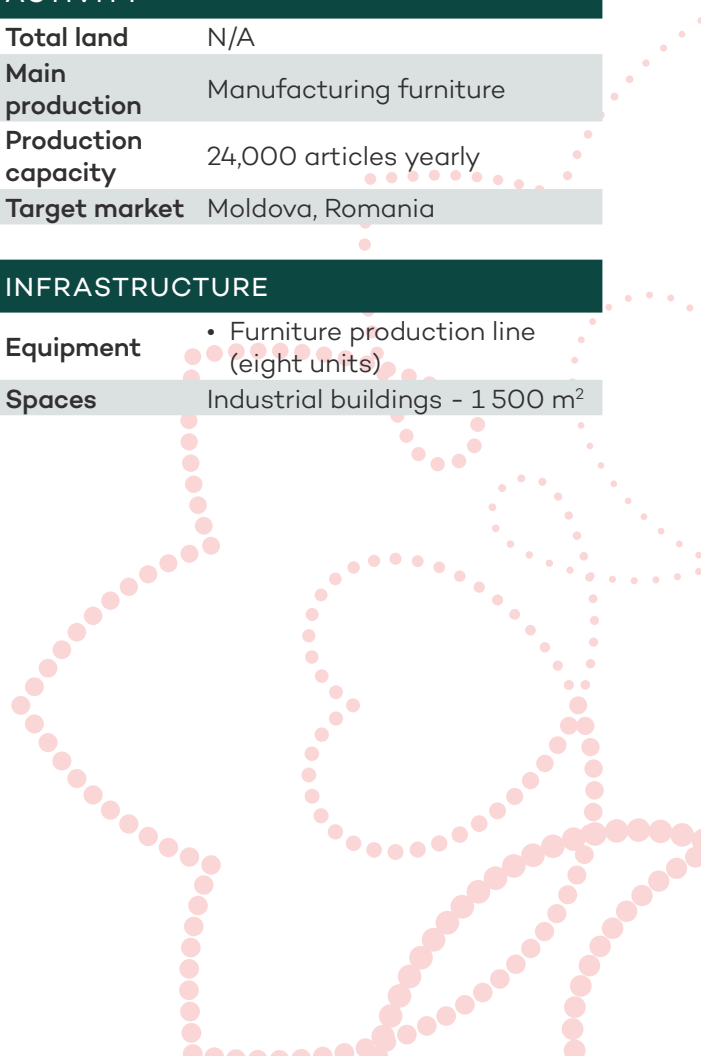

SECTOR

Production

SUB-SECTOR

Furniture production

- **Annual production:** about 24 000 items;
- **Investment needs:** more energy-efficient systems and equipment;
- **Investment prospect:** extensive experience, with substantial positive results;
- **Investment advantage:** quality products with high added value.

PROJECT OVERVIEW

PROJECT GOAL

- Increasing revenue by offering customers a varied range of products.
- Increasing production capacity by reducing the cost of production.
- Growing the company by developing new products and value chains.
- Promoting the company on the local market, and seeking international cooperation.

WHY INVEST?

- There are opportunities to develop all types of production.
- The domestic and foreign markets for furniture (primarily upholstered) are growing.
- Good availability of labour force and necessary premises for the production of furniture.
- High growth capacity.

COMPETITIVE ADVANTAGES

- Income is stable and predictable.
- Company balances economic profits with environmental responsibility.
- Company increases its production capacity through the rational use of resources.
- Rigorous quality control of each product.
- A reputable company, thanks to the quality of the products and its affordable prices.
- An advantageous geographical situation.
- The possibility of expanding the production range.
- A well-established operational process that ensures impeccable quality of the products manufactured.

- Experience in selling its own products on the local and international markets.
- Company has its own showroom.

TARGET GROUP

Interstepcom LTD is a company with rich experience in the furniture industry, and has managed to achieve a high level of recognition locally. About 80% of its production is sold on the local market and about 20% on the international market. The company is constantly looking for new clients and international partners that have potential new market shares in development. The company's main priorities are expanding the sales market and promoting production abroad. Increasing export capacity requires investment in both marketing and in energy-efficient equipment, to reduce production costs.

INFRASTRUCTURE

Schif-1 LTD

PROJECT BACKGROUND

Schif-1 LTD is a company with over 30 years of experience, mostly focused on the HoReCa segment, managing a mini hotel with restaurant: the Marco Polo Hotel and Restaurant. High-quality services and an individual approach have always favourably distinguished the company from its competitors on the domestic market. The accommodation capacity in the mini hotel is approximately 4,300 people annually. Of the total services provided, the majority relate to the provision of food to the general public, with the company able to serve approximately 120,000 people per year.

Schif-1 LTD owns a well with a depth of 565 metres, from which it obtains mineral water. The mineral water, which has a pungent smell due to the presence of hydrogen sulfide and iodine, is recommended in the treatment of various types of ailments. Water with the same mineral composition is used to treat patients at the famous Nufărul Alb sanatorium in Cahul. The company aims to diversify the services it offers to its customers, through the design and construction of a sanatorium to provide balneo-curative and medicinal services.

The company is established in the city of Cahul. The main indicators for its geographical location are as follows:

- 10 km by land from the EU border (Romania).
- 203 km from Chisinau International Airport.
- Access to the national road network.
- Access to the railway network.

Main production	Hotel services
Production capacity	Serving 120,000 people annually
Target market	Moldova, Romania

INFRASTRUCTURE

Natural resources	<ul style="list-style-type: none"> • Probe with healing mineral water.
Spaces	<ul style="list-style-type: none"> • Industrial buildings - 1 490 m²; • Warehouse - 40 m².

PROJECT OVERVIEW

PROJECT GOAL

- Increasing revenue by offering clients a varied range of services.
- Increasing its capacity to provide health treatments to the population.
- Improving the aesthetic appearance and unique character of the location.

WHY INVEST?

- Development opportunities for all types of activities.
- Demand for balneo-curative services continues to increase.
- High growth capacity;
- Company will be able to provide a wide range of curative and medicinal services to local and international clients.

COMPETITIVE ADVANTAGES

- Stable and predictable nature of income.
- Only one competitor at the national level.
- Company has its own well, which provides healing mineral water.
- Improving the health status of the population based on excellent performance and low costs.
- An advantageous geographical situation.
- The possibility of expanding the company's range of services.
- Water analysis (to present samples)
- The creation of new jobs.

- Quality services will help attract international customers.

TARGET GROUP

The city of Cahul is famous for its medicinal mineral waters and is attracting increasing interest at the national level. Not only will the new sanatorium bring added value to the business itself, but it will also satisfy the market demand for quality sanatorium services, including by increasing the degree of comfort offered to customers. Due to its ability to offer natural healing services, the business will advance by leaps and bounds not only nationally, but also internationally. The modern sanatorium will be able to offer 150 places.

Machinery	Specific processing equipment
Spaces	Warehouse for processing

PROJECT OVERVIEW

PROJECT GOAL

- Storing grain at a lower cost, in order to increase its competitiveness in the internal and external markets.
- Obtaining the maximum yield of the finished product by minimizing crop losses.

WHY INVEST?

- A stable national market.
- Increased export potential.
- A state-subsidized sector.
- High demand for vegetable crops in the market (national and international).

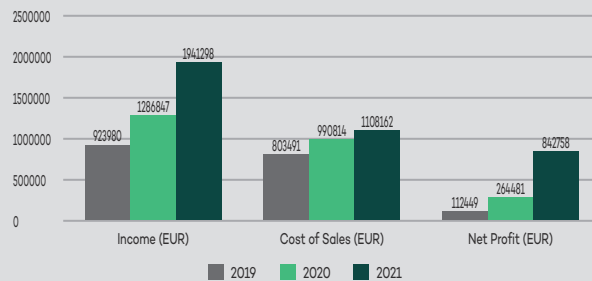

COMPETITIVE ADVANTAGES

- Access to the international market.
- Certificates of harmlessness (ANSA).
- Rich experience in the agricultural sector.
- Experience in marketing its own production on the local and international markets.
- The possibility of expanding into new crop types for which there is demand in the market.
- Resistance to climate change.

TARGET GROUP

Gigalboe Agro LTD has been present in the local and international markets since 2005. The domestic market currently represents the main point of sale for the vegetable crops it produces. Approximately 80% of its production is sold on the local market and approximately 20% on the Romanian market. The company is constantly looking for new customers and international investors that have potential new market shares in development. The company's mission is to expand the sales areas for its own production, to increase the number of customers it serves, and to establish itself as a reputable business in the national and international markets.

Rumix Stil LTD

PROJECT BACKGROUND

Rumix Stil LTD (Eco-Village Văleni) is a local social business that is located in the southern part of the Republic of Moldova. It works to promote the development of Văleni as a tourist region and the Beleu Lake ecosystem, which is part of the first UNESCO Biosphere Reserve, "Lunca Prutului de Jos". The Lunca Prutului area (the Prutul de Jos Nature Reserve and Lake Beleu) is an important areas for rural tourism services, offering opportunities for visitors to engage in rural activities, learn about local folklore, undertake excursions, and experience local entertainment and traditions.

The main business sectors are rural activities, cultural activities, wine production, and eco-tourism. The wine production capacity is about 20 tons annually. The accommodation capacity in Casa Dorului Guesthouse is about 900 people annually, and about 2,000 foreign tourists visit from cruise ships per season.

The company is established in the village of Văleni, Cahul district. The main indicators for its geographical location are as follows:

- 19.5 km from Giurgiulesti Port.
- 20 km from the EU border (Romania).
- 203 km from Chisinau International Airport.
- Located on the banks of the Prut River.
- Access to the national road network.
- Access to the railway network.

Spaces	<ul style="list-style-type: none"> • Building area of 1,000 m²; • Production hall of 120m².

PROJECT OVERVIEW

PROJECT GOAL

- Increasing income by developing the level of comfort offered to tourists and visitors.
- Improving the aesthetic aspects and the unique character of the location by respecting ancestral traditions.

WHY INVEST?

- Tourist services specific to adventure tourism, with boats and kayaks/canoes.
- A state-subsidized sector (AIPA).
- There is high demand for the eco-tourism sector.
- A varied range of tourist destinations.

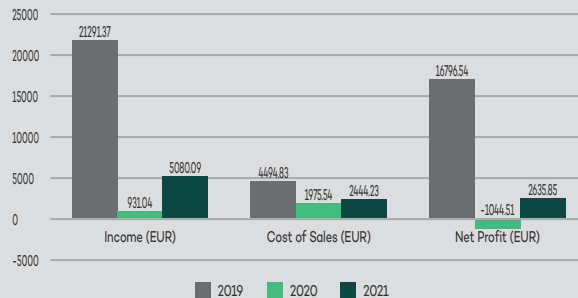

COMPETITIVE ADVANTAGES

- It has the status of „Market Market” in the field of ecological tourism.
- Access to the EU market (Romania, Germany, Austria).
- Rich experience in the field.
- The only tourist stop in Lunca Prutului that is able to operate tourist tours for up to 50 people.
- A good cost/service ratio for its clients.
- The bridge connecting the Romanian market and the Republic of Moldova.
- The possibility of expanding the rural tourist complex.

TARGET GROUP

Eco-Village Văleni is of national and international interest to nature and folklore lovers, due to its ability to provide specifically Moldovan hospitality. Its ability to accommodate mixed groups of tourists has increased its interest to foreign tourists and visitors participating in cruises on the Danube. Approximately 45% of visitors are foreigners (from Romania, Ukraine, Austria and Germany). In this context, in order to develop its eco-tourism, adventure tourism and wine tourism offer, **Rumix Stil LTD** is seeking to expand its sales market globally (to Asia, Africa and North America).

INFRASTRUCTURE

Terra-Vitis LTD

PROJECT BACKGROUND

Terra-Vitis LTD was founded in 2002. Its main activity is the cultivation and commercialization of agricultural products. The company manages about 1,788 hectares (ha) of agricultural land, of which 1,681 ha is occupied by field crops, 83 ha by grapes (table varieties and technical varieties), and the remaining 24 ha by cherry, apple and pear orchards. The company also has post-harvest production infrastructure: harvested fruit is stored in cold storage in a 600-ton refrigerator, which also has two pre-cooling rooms of 30 tons each. For the implementation of the proposed investment project, and taking into account the established objectives, the owner proposes to make investments in the horticultural field: namely, the installation of equipment for the combined anti-hail/anti-rain system, on an area of 7 ha. **Terra-Vitis LTD** has the post-harvest infrastructure necessary for the pre-cooling, sorting, calibration and packaging of its cherry production. The production is mostly exported to the markets of the Russian Federation and Belarus between May and July

The company is established in Burlacu village, Cahul district. The main indicators for its geographical location are as follows:

- 35 km by land from the EU border (Romania).
- 40 km from the port of Galati.
- 35 km from the port of Reni.
- Access to the national road network.
- Access to the railway network.

PROJECT OVERVIEW

PROJECT GOAL

- Reducing the risk of losing the cherry harvest due to heavy rains and hail during the fruit ripening period.
- The formation of fruit batches for the export of production.
- Production launch in potential new markets.

WHY INVEST?

- A stable national market.
- Increased export potential.
- A state-subsidized sector.
- High demand for cherries in the market (national and international).
- Availability of the necessary equipment, labour and storage space.

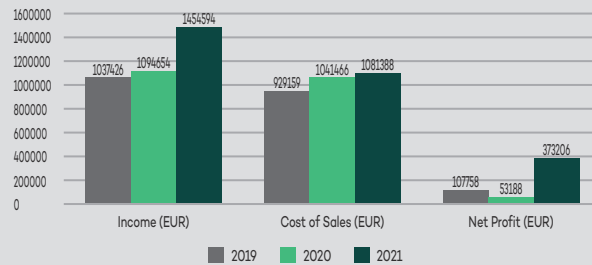

COMPETITIVE ADVANTAGES

- Access to the international market.
- The existence of cold storage facilities for fruit.
- High quality of the cherry production.
- Certificates of harmlessness (ANSA).
- Investment will reduce the risk posed by heavy rains and hail during the cherry ripening period.
- Rich experience in the wine sector.
- Experience in marketing company's own production on the local and international markets.
- Commercialization in stable and homogeneous batches of cherry production.
- Advantageous price policy for both the producer and the buyer.

TARGET GROUP

Terra-Vitis LTD is one of the largest producers of cherries in southern Moldova. About 30% of the production is sold on the local market and about 70% on the international market. Investments in marketing and outlets are needed to increase export capacity. The company's core priority is to attract customers by offering quality production at favourable prices. The business has a high potential to penetrate new markets and obtain higher revenues. From the price point of view, the company will focus on the medium and high price segments, as determined by the high quality of the fruit grown on intensive plantations.

INFRASTRUCTURE

Auto Garant LTD

PROJECT BACKGROUND

Auto Garant LTD represents a business at the beginning of the path, designed to escalate very quickly. Although the business was founded in 2013, the launch of the services on the market will follow from the fall of 2022. All this time the company has been focused on attracting investments for the construction of the self-service building and equipping it with equipment and machinery necessary for the work process. The main fields of activity are the technical servicing of cars of different tonnage and the transportation of goods and products. The forecast of the professional capacity to provide services in the own workshop represents an annual volume of about 1 500 means of transport. Taking into account that both the district agricultural market and different types of enterprises register insufficiency regarding the transportation of goods, the company proposes to widen the spectrum of services by offering land transport services in national and international traffic.

Portfolio of Investment Opportunities

14

The company is established in the city of Cahul. The main indicators for its geographical location are as follows:

- 19.5 km from Giurgiulesti Port.
- 20 km from the EU border (Romania).
- 203 km from Chisinau International Airport.
- Access to the national road network.
- Access to the railway network.

ACTIVITY

Total land	5,5 ha
Main production	Technical services
Production capacity	Means of transport - 1 500 (annually)
Target market	Moldova, Romania

INFRASTRUCTURE

Equipment	<ul style="list-style-type: none"> • Self-loading tractor for concrete production, • Automotive/agricultural machinery testing line; • Stand to adjust the steering angle of cars.
Means of transport	<ul style="list-style-type: none"> • Self-service machine; • Elevator - 4 units; • Press; • Compressor; • Motor vehicles (2 units).
Spaces	<ul style="list-style-type: none"> • Surface of the building with 3 levels 870 m²; • Hall - 100 m².

PROJECT OVERVIEW

PROJECT GOAL

- Increasing revenue by offering clients a varied range of services;
- Reduction of transport costs by using own transport;
- Increasing competitiveness for the internal and external market.

WHY INVEST?

- Development opportunities in all types of activities;
- The continuous increase in the demand for the transport of goods;
- A wide range of services for all types of cars.
- High growth capacity.

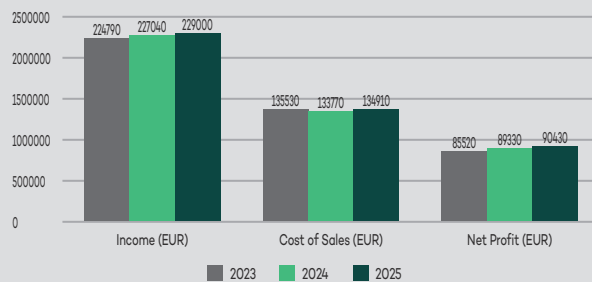

COMPETITIVE ADVANTAGES

- Stable and predictable nature of income;
- Lack of competitors in the region;
- The availability of servicing all types of vehicles of any tonnage;
- Qualified employees in the field;
- The only service provider in the region regarding the adjustment of the steering angle of motor vehicles;
- Providing a wide and complex spectrum of quality services based exclusively on efficient performance and costs;
- The advantageous geographical situation;
- The possibility of expanding the range of services;
- Car service license.

TARGET GROUP

Based on the market analysis **Auto Garant LTD** has identified the increased demand for the national and international transport of goods by land. What has led the company to focus on investments in this area. Due to the correct choice of cars for transport, especially in the case of new fleets that are not old, travel costs will be minimal compared to the existing means of transport in the area that have considerable ages. In this context, in order to develop the business, the company intends to launch and rapidly advance goods transportation services at national and international level.

INFRASTRUCTURE

ME Vinia Trăian JSC

PROJECT BACKGROUND

ME Vinia Trăian JSC is a wine factory located in the town of Găvănoasa, on the left bank of the historic Cahul river. It is located in an excellent area for the cultivation of vines and has its own vineyards, which cover an area of 392 hectares (ha). The vineyards are within a distance of only 5 km from the factory, on the slopes of the Bugeacului Steppe and the vineyards of the Valul lui Trăian wine region, which has a geographical indication. The company's main activities are the processing of grapes and the manufacture and sale of wines on the domestic and foreign markets. The company's sales market includes Romania, Poland, the Czech Republic and Belarus. The active capacity is 10,000 tons of grapes in a processing season. The entity produces a wide assortment of wines, covering over 17 wine names. Annually, of the total amount of grapes collected, 90% are processed for dry wines and raw wines for sparkling wines. The company is looking for investments in order to expand its sales market and to promote its production abroad.

The company is established in Găvănoasa commune, Cahul district. The main indicators for its geographical location are as follows:

- 30 km by land from the EU border (Romania).
- 40 km from the port of Galati.
- 35 km from the port of Reni.
- Access to the national road network.

INFRASTRUCTURE

SUD-INVEST COMPANY LTD

PROJECT BACKGROUND

SUD-INVEST COMPANY LTD holds the title of Industrial Park from Cahul, based on Government Decision no. 106 of 26 February 2016. The company has been designed to scale very quickly. The company was founded in 2014. Since then, it has focused on business development. To date, all infrastructure, access roads, parking lots and engineering networks (water, sewage, gas and electricity) have been built. Thus, in 2023, the Cahul Industrial Park became functional, with optimal operating conditions being created. The main fields of activity of the company are the construction of buildings, engineering construction, installations and technical-building networks, reconstruction, consolidation, restoration and providing a wide spectrum of services to the residents of the park. It is forecast that the services the company provides within the Industrial Park will yield an annual turnover of approximately EUR 1,123,820. This includes the lease of production halls and administrative spaces, and the lease of parcelled land for entrepreneurial activities.

Portfolio of Investment Opportunities

22

The company is established in the city of Cahul. The main indicators for its geographical location are as follows:

- 45 km from Giurgiulesti Port.
- 7 km from the EU border (Romania).
- 171 km from Chisinau International Airport.
- Access to the national road network and the railway network.

Providing services

- **Services:** lease of premises for production, storage and offices – 12,410.70 m²; land available for construction approx. 20,000 m²
- **Investment needs:** to increase the spaces required for production/service activities with advanced and ecological technologies in the area.
- **Investment prospect:** short periods of activity, with major prospects for attracting new customers.
- **Investment advantage:** landscaped territory and connected to engineering networks.

GENERAL INFO

Established	2014
Location	Cahul municipality, Griviței str
Ownership	Susanu Boris – 51.00%
	Susanu Dumitru – 45.00%
	Dascaloi Gheorghe – 4.00%
Main activity	Administration and provision of services for the residents of the industrial park
Employees	3

ACTIVITY

Total land	5,892 hectares
The main services	Renting production/auxiliary/storage rooms/offices
Capacity of industrial premises	12 410,70 m ² (annually)
Land available for construction	20 000 m ²
Target audience	Moldova, Ukraine, Romania and other European countries

INFRASTRUCTURE

Engineering networks	<ul style="list-style-type: none"> • aqueduct with a diameter of 300 mm; • sewage system with pumping station 25 m³/hour; • electricity network, with two 10 kW connections; • street lighting system; • gas supply; • telephone and internet.
Access ways	<ul style="list-style-type: none"> • asphalted roads – 8250 m²; • parking lots - 140.
Equipment	<ul style="list-style-type: none"> • Maximal automatic line on hydraulic lift 2.0. • Compact concrete plant.
Machinery	<ul style="list-style-type: none"> • single shaft mixer BP-1G-300. • Linde E16C-02 electric forklift. • Manitou 1850 TAD 104 telescopic forklift
Spaces	<ul style="list-style-type: none"> • production building – 1 500 m²; • production building (degree of completion: 30%) – 2 777,9 m²; • production building (degree of completion: 30%) – 8 628,6 m²; • administrative building (degree of completion: 30%) – 1 004,20 m².

PROJECT OVERVIEW

PROJECT GOAL

- Increasing revenues by offering customers a wide range of services on a commercial basis.
- Completion of production halls, in order to create favourable conditions for residents engaged in production in various fields.
- Increasing competitiveness by attracting national and international customers.

WHY INVEST?

- A continuous increase in the demand for production/service spaces with advanced and ecological technologies.
- Availability of the necessary equipment and labour force.
- High business development capacity.
- Maritime and fluvial accessibility ensured by Giurgiulesti International Port.

COMPETITIVE ADVANTAGES

- Stable and predictable nature of income.
- Lack of competitors in the region.
- Qualified employees in the field.
- Landscaped territory and connected to engineering networks.
- Provision of large production and storage spaces.
- Business is located in the industrial area of Cahul region.
- An advantageous geographical situation.
- Authorization.
- Capacity to increase new jobs.
- The possibility of expanding the range of services provided.

TARGET GROUP

SUD-INVEST COMPANY LTD estimates that the new business infrastructure in Cahul Industrial Park will attract direct investment to the region and create new jobs by the end of the park's fifth year of operation. The target customers are international and national economic agents (i.e. future residents of the Industrial Park) who are interested in the creation and development of production within the territory of the Industrial Park using the facilities provided. The development of business infrastructure in the Southern Development Region will create a favourable investment environment. Some economic agents have already shown an interest in obtaining a land or production space within the Industrial Park for the manufacture of furniture and carpentry articles, and construction materials, as well as for the production of textile articles. The company intends to develop commercial relations with international partners interested in expanding their business in Moldova.

INFRASTRUCTURE

Bezman LTD

PROJECT BACKGROUND

Bezman LTD operates in the food industry: namely, bread and pastry production. Its main activity is the manufacture of bakery products. It offers the population in its area the opportunity to buy its products at a fair price. Its products are superior in quality to other existing products on the market. Bezman LTD is among the top 10 natural bakery producers in the local market and in the southern part of the country. The company has its own bakery which operates according to the principles of respecting the utility of yield and ensuring efficient operations, without losing sight of the ergonomic factor. The varied assortment of products it provides allows it to satisfy consumer demand in the area. The annual production capacity is approximately 50 tons of bakery/pastry products. The company is looking for investments to achieve sustainable development by reducing its energy costs and to expand its sales market at the national and international levels.

The company is established in the city of Cahul. The main indicators for its geographical location are as follows:

- 15 km by land from the EU border (Romania).
- 45 km from the port of Galati.
- 30 km from the port of Reni.
- Access to the national road network.
- Access to the railway network.

PROJECT OVERVIEW

PROJECT GOAL

- Investments in the development of alternative energy sources to reduce the final price of its own services and products, to make the business more efficient.
- Launching products in potential new markets.
- Widening the product range.

WHY INVEST?

- A stable national market.
- Increased export potential.
- Guaranteed points of sale.
- High demand for bakery products in the market (national and international).
- The required capacity of the labour force and the availability of production premises.

COMPETITIVE ADVANTAGES

- Access to the international market.
- An advantageous geographical situation.
- Rich experience in the food industry.
- Experience in selling its own products in the local market.
- Placing production on the market at affordable prices thanks to modern energy-efficient equipment.
- The possibility of expanding the product range.
- Major investments in modern equipment and machinery in recent years.
- Possibility of increasing price efficiency.

TARGET GROUP

Bezman LTD is one of the safest producers in the bakery industry that opts for 100% natural products from the south. The company delights its national consumers by providing them with an assortment of novel products. Every year, it keeps up with market trends and demands, so as to offer diversity and choice. About 90% of the production is sold on the local market and about 10% on the international market. The company's core priority is attracting customers by offering quality production at favourable prices. The company is looking for new international investors that have potential new market shares in development.

„Modernus” JSC

PROJECT BACKGROUND

Modernus JSC has 28 years of successful experience in trading in a wide range of goods, predominantly building materials. The diversity of the products sold allows the company to meet all construction and repair needs in the south of the country, including the Cahul region. The company benefits from innovative technologies, large commercial areas, and skilled workers. In the last two years, the company has developed an online store, “MSHOP”, which is the only active store of its kind in the south of the country. The number of purchases per day represents an average volume of about five positions. The annual capacity of traded goods is about 10,000 positions. The company has concluded contracts with about 500 companies, both resident suppliers and non-residents (about 30 of the latter), including international transport companies.

The company is established in the city of Cahul. The main indicators for its geographical location are as follows:

- 19.5 km from Giurgiulesti Port.
- 20 km from the EU border (Romania).
- 203 km from Chisinau International Airport.
- Access to the national road network.
- Access to the railway network.

SECTOR

Trade

SUB-SECTOR

Retail and wholesale

- **Investment needs:** necessary capacity to store goods.
- **Investment prospect:** increasing the storage capacity for the vast assortment of goods provided will allow for an increase in the number of wholesale customers.
- **Investment advantage:** the establishment of the wholesale commercial warehouse on the outskirts of the city will solve the problem of traffic jams in the unloading areas, including reducing environmental pollution.

GENERAL INFO

Established	1994
Location	Cahul district, Cahul city, 64 Ștefan cel Mare str
Ownership	Gangan Liubovi – 100%
Main activity	Retail and wholesale
Employees	114

ACTIVITY

Total land	1.3 hectares
Main production	Building materials
Production capacity	About 10,000 positions (annually)
Target market	Moldova, Romania

INFRASTRUCTURE

Equipment	<ul style="list-style-type: none"> • Refrigerators – 22 units. • Freezers – 4 units.
Machinery	<ul style="list-style-type: none"> • Motor vehicles – 14 units. • Forklifts – 3 units.
Spaces	<ul style="list-style-type: none"> • Building area – 7,230 m²

PROJECT OVERVIEW

PROJECT GOAL

- The creation of a commercial unit on the outskirts of the city, with the aim of streamlining traffic and reducing the level of pollution.
- Increasing revenue by offering customers a more varied range of goods.
- Increasing competitiveness in the internal market.

WHY INVEST?

- Availability of financial resources, labour and a good reputation in the market.
- Continued growth in the demand for construction materials.
- A stable national market.
- High growth capacity.

COMPETITIVE ADVANTAGES

- Stable and predictable nature of income.
- Lack of competitors in the region.
- Qualified employees in the field.
- Successful activity for 28 years.
- It has its own nationally recognized brand.
- The only online building materials store in the area.
- The existence of platforms for attracting customers.
- The availability of modern techniques and innovative technologies, which considerably reduce costs for the end consumers.
- An advantageous geographical location.

TARGET GROUP

The sales market is currently registering a high demand for construction materials, which has led the company to focus on investments in order to create a commercial unit on the outskirts of Cahul. As a result of this new unit, residents of rural areas will have easy and convenient access to construction materials. The target buyers are both large national construction companies and individuals with projects relating to the construction and repair of individual houses in the city and in the rural areas of the south of the Republic of Moldova. **Modernus JSC** aims to increase the number of customers by implementing more efficient technologies for the production of goods.

Căsuța Noastră JSC

PROJECT BACKGROUND

Căsuța Noastră JSC was founded in 1993, with a focus mostly on the HoReCa segment, with the overall goal of sustainable economic recovery, creating new jobs and building resilience to protect the health and well-being of the people of the Cahul region. The company's activity includes trade, rental and exploitation of its own/leased real estate, and providing hotel services. Căsuța Noastră JSC currently owns premises with a total area of 1,935 m². The company owns a shopping centre that is currently leased, and a cafe that has been operating since 2014. The cafe is located in the centre of Cahul in a developed commercial area, close to Central Park, Central Square, and residential neighbourhoods. At the same time, the business manages a mini hotel, with accommodation capacity of 5,110 people annually. High-quality services and an individual approach have always favourably distinguished the company from its competitors in the national market.

Portfolio of Investment Opportunities

28

The company is established in the city of Cahul. The main indicators for its geographical location are as follows:

- 5 km by land from the EU border (Romania).
- 175 km from Chisinau International Airport.
- Access to the national road network.
- Access to the railway network.

PROJECT OVERVIEW

PROJECT GOAL

- Increasing revenues by offering clients a varied range of quality services.
- Expanding the capacity to provide services, and creating new jobs.
- Promotion and utilization of modern technologies in public food.

WHY INVEST?

- Company employs professionals in the field of public catering.
- The availability of the necessary spaces for business development and a good reputation in the HoReCa field.
- A favourable geographical position for attracting EU customers.

COMPETITIVE ADVANTAGES

- Rich experience in public catering.
- The possibility of expanding the types of services provided.
- The sustainability of the business has been proven over time.
- Has launched Mediterranean cuisine at an affordable price thanks to the installation of renewable energy sources.
- A cost/service ratio that is beneficial to the clients.
- Professional, trained employees.
- Offers a wide range of products.
- A menu and services that are unique in the area.

TARGET GROUP

The target audience is the citizens of the city of Cahul, which has a population of approximately 41,100 inhabitants and is located in the south-western part of the Republic of Moldova, 5 km from the border with Romania and 175 km from Chisinau, being considered the southern capital of Moldova. The proximity to the borders with Romania and Ukraine, as well as the growing tourism in the area, make the city an important stopping point for travellers and tourists. About 3,800 economic agents, eight preschool institutions, three primary schools, two gymnasiums, five high schools, five middle schools, two vocational schools and one multipurpose school are registered as present in the city of Cahul. At the moment, 83 public food establishments operate in the city of Cahul, most of them being pizzerias, brasseries, cafes, buffets, confectionery providers, and canteens, which do not have menus that specialize in healthy food.

SUB-SECTOR

Commercialization of construction materials

- **Investment needs:** expanding its sales market by diversifying the assortment of materials provided.
- **Investment prospect:** expanding the production range will increase the number of customers.
- **Investment advantage:** products/services with high added value and a competitive price.

GENERAL INFO

Established	2013
Location	Cahul district, Zîrnești commune
Ownership	Galaju Andrian – 100%
Main activity	Commercialization of building materials
Employees	10

ACTIVITY

Total land	0,49 hectares
Main production	Building materials
Production capacity	Approximately 11,934 positions (annually)
Target market	Republic of Moldova

INFRASTRUCTURE

Equipment	<ul style="list-style-type: none"> • Front loader. • Balkancar forklift.
Machinery	<ul style="list-style-type: none"> • Trucks – four units (ready for lifting).
Spaces	<ul style="list-style-type: none"> • Building/warehouse – 468,8 m²

PROJECT OVERVIEW

PROJECT GOAL

- The creation of a showroom-type commercial unit, with the aim of expanding the production/merchandise range.
- Increasing revenue by offering customers a more varied range of goods.
- Increasing competitiveness in the domestic market.

WHY INVEST?

- Availability of financial resources and labour, and a good reputation in the market.
- The continuous increase in the demand for modern building materials.
- A stable national market.
- High growth capacity.

COMPETITIVE ADVANTAGES

- A stable and predictable nature of income.
- A lack of competitors in the region.
- Employees who are qualified in their field.
- Successful activity for nine years.
- It has its own shop located in the commune.
- The only building materials store in the area.
- Existence of platforms for attracting customers.
- The availability of modern techniques and innovative technologies that considerably reduce costs for end consumers.
- An advantageous geographical location.

TARGET GROUP

The retail market is currently registering a high demand for construction materials, which has led the company to focus on investments in order to create a showroom-type commercial unit in Zîrnești commune. The commercial facility, which will provide a wide range of products/merchandise, will meet the needs of the customers. The target buyers are both large national construction companies and individuals with projects related to the construction and repair of individual houses in the city and in the rural areas of the south of the Republic of Moldova. The increase in the number of employees from two to 10 people in 2021 had a positive effect on both turnover and net profit.

INFRASTRUCTURE

Construction of a photovoltaic panel station at SA Water-Canal Cahul

PROJECT BACKGROUND

There are currently no photovoltaic panel stations that can generate electricity from renewable energy sources in the municipality of Cahul. Taking into account modern trends, there is a strong need for this technology to increase energy efficiency. There is an urgent need for this technology at the pumping station of JSC Apă-Canal Cahul, which is currently dependent on electricity from thermal plants using gas, coal and fuel oil, which is not energy efficient or practical and which, at the same time, have a negative impact on the environment and the health of the population. The municipality of Cahul aims to become energy independent and environmentally friendly. Renewable energy sources have an important energy potential and offer unlimited availability for local and national use. The valorization of renewable energy sources is based on three important factors: accessibility, availability and acceptability. These requirements can be achieved in the national context through the implementation of energy conservation policies, increasing energy efficiency and increased utilization of renewable sources.

The investment is expected to be carried out in the municipality of Cahul. The main indicators for the entity's geographical location are as follows:

- 5 km by land from the EU border (Romania).
- 182 km from Chisinau International Airport.
- Access to national road network and railway network.

 Nicolae Dandiș, mayor

Number of direct beneficiaries	Over 50,000 people
Potential for investment expansion	Attracting new investors through creating PPPs
The objective of Sustainable Development pursued	<ul style="list-style-type: none"> Sustainable cities and communities. Poverty reduction.

TECHNICAL DATA

The field of intervention	Energy security
The estimated value of the project	EUR 750,000
Co-financing capacity	10% of the project amount
Expected duration of the action	12 months

PROJECT OVERVIEW

PROJECT GOALS

- Ensuring energy security for the development of a stable economic environment, in a sustainable manner, within the municipality of Cahul, through the construction of a photovoltaic panel station at the pumping station of SA Apă-Canal Cahul

RELEVANCE OF THE PROJECT

- Improving environmental protection and energy efficiency, as well as the ability to cope with climate change, and reducing dependence on energy imports or a single energy carrier.

MAIN DISCOUNTED RESULTS

- Photovoltaic panel station at SA Apă-Canal Cahul is functional and efficient.
- Creating energy independence in the provision of water and sewerage services of SA Apă-Canal Cahul.
- Creation of a model for operation of the photovoltaic panel station for nearby localities.

- Improving the activities provided by economic agents in the municipality of Cahul.
- Improving the quality of life of citizens of the municipality of Cahul.
- Increased attractiveness of the area for businesses

CORRELATION WITH MAIN LOCAL, REGIONAL AND NATIONAL STRATEGIC DOCUMENTS

The project is correlated with the following main local, regional and national strategic documents:

- The Vision, Strategic Development Directions and Action Plan of the municipality of Cahul 2019 – 2025, through Strategic Direction 3: Environmental protection and increasing energy efficiency in the public and private sector, and Specific Objective 3.3: Increasing the energy efficiency of public and private sector facilities.

INFRASTRUCTURE

Sanitation for, and development of, the Frumoasa Lake area, with the creation of a recreation area

PROJECT BACKGROUND

The Frumoasa Lake area is currently completely undeveloped and has lost its attractiveness due to the wildness of the vegetation and the lack of a clear set of objectives and measures for maintaining the vegetation and allowing for public access. Also, the absence of certain activities, such as leisure, recreational, cultural and sports activities, has led to a decrease in the public's interest in spending their free time in this natural location. The land bordering the lake is currently disused and abandoned, and serves no function. The lake is roughly circular in shape. The land around the lake is relatively flat. The lake's banks are slightly sloping. There is no road to allow easy access to this area. The redevelopment of the area is very important as it will provide citizens with opportunities for useful leisure time, benefiting individuals and society. It will provide an area where citizens will be able to escape from their daily environment, including congestion and urban stress. The development of the territory will also highlight the resources available in the area, including various activities and services that can be provided by economic agents who are interested in developing small businesses in the recreation area near the lake.

The investment is expected to be carried out in the municipality of Cahul, with the main indicators for the entity's geographical location being as follows:

- 5 km by land from the EU border (Romania).
- 182 km from Chisinau International Airport.
- Access to the national road and railway networks.

Local Business Development Center in Crihana Veche village, Cahul district

PROJECT BACKGROUND

Crihana Veche Town Hall, located in Cahul district, has recently successfully completed a major investment project in the modernization of local infrastructure. This initiative was supported by EU4Moldova: Focal regions Programme, financed by the European Union and implemented by the United Nations Development Program (UNDP) and the United Nations Children's Fund (UNICEF), representing a significant step in the economic development of the region.

The Local Business Development Center in the village of Crihana Veche was completely renovated in 2023 and is now a modern and functional space dedicated to the stimulation of local businesses. This center is organized on three levels, having a total area of 1 443 m², with each level having approximately 450 m². It also has an independent energy system and is connected to all the necessary utilities, including the access road to the R-34 national road.

Through the modernized infrastructure and its strategic location, the Local Business Development Center covers an extensive sales area, serving not only the Crihana Veche town, but also the neighboring areas, including the municipality of Cahul, offering benefits and opportunities for investors from various sectors. This initiative facilitates the opening of new businesses, contributes to the creation of jobs, being estimated to generate approximately 150 new jobs.

Crihana Veche Town Hall aims to develop solid partnerships with investors interested in opportunities in our region, is open to collaborate with local and international investors to exploit the economic potential of the area and support business growth and diversification. Benefiting from modernized infrastructure, rich natural resources and a favorable investment climate. If you are interested in learning more about investment opportunities in Crihana Veche or discussing potential partnerships, we invite you to contact us to initiate a constructive discussion and explore together the possibilities of profitable investment in this developing region.

Through the Local Business Development Center, Crihana Veche City Hall demonstrates its commitment to stimulating the local economy, strengthening cooperation between public authorities and the business environment, while improving the quality of life for the local community and surrounding areas.

SECTOR

Public services/ private services

The Business Development Center is built in Crihana Veche village, Cahul district. The main indicators for entity geolocation are:

- 5 km to the town of Cahul
- 5 land km to the EU border (Romania);
- 182 km to the Airport Chisinau International
- Access to national road and railway.

 Igor Miclaus, Mayor of Crihana Veche

 primaria-crihana@mail.ru

IMPACT

The population of the municipality 4 550 citizens

Number of direct beneficiaries More than 4 000 people

Potential for investment expansion Attracting new investors
Sustainable communities

Sustainable Development Goals pursued

- Poverty reduction;
- Decent work and economic growth.

TECHNICAL DATA

Field of intervention Identification of the residents of the Business Center

Conditions created

- The center completely renovated in 2023
- Area: 1 443 m²
- Structured in 3 levels with separate access to water networks/sewerage/meters, independent energy system
- Supervised area
- Elevator cargo lift
- Attractive price for the rent of the space 5-7 eur/m²
- Separate access for vehicles
- Arranged parking area

PROJECT OVERVIEW

PROJECT GOALS

- Increasing the level of economic development of the locality, by improving the local public infrastructure for the amplification of economic opportunities in the village of Crihana Veche, Cahul district.

RELEVANCE OF THE PROJECT

The relevance of the Local Business Development Center in Crihana Veche village, Cahul district, is expressed through:

- increasing the attractiveness of the locality for investors;
- reducing the effects of labor force migration to the city;
- considerable increase in receipts in the local budget;
- ensuring the necessary conditions for the improvement of local public services;
- creation and development of new services for the local population.

MAIN DISCOUNTED RESULTS

- Attracting potential residents (opening new businesses) to create new jobs;
- About 150 jobs created for the local population of Crihana Veche village and neighboring villages.
- At least 150 families improve their financial situation, increase their income and level of well-being;
- Improving the phenomenon of migration.

CORRELATION WITH MAIN LOCAL, REGIONAL AND NATIONAL STRATEGIC DOCUMENTS

The project is correlated with the main local, regional and national strategic documents:

The vision, development directions of the Socio-Economic Development Strategy of the village of Crihana Veche (2020-2025)

INFRASTRUCTURE

Measures to prevent landslides on route L-668 from Andrușul de Jos village

PROJECT BACKGROUND

Landslides first started to occur in the village of Andrușul de Jos in 1993 and have gradually expanded to cover an area of 1.5 hectares. Between 2000 and 2020, two residential houses were ruined and a 250 metre-long section of road collapsed, which in 2017 stopped the flow of public transport to the neighbouring village of Andrușul de Sus. These landslides created major inconveniences in regard to delivering food to public institutions (one kindergarten and one school) and delivering goods to six economic agents, as well as blocking public and private transport. At the same time, the area covered by these landslides has been advancing by 10–15 cm per year, and they now constitute a major threat to the lives of 500 locals, as well as posing the risk of blocking the access road to Andrușul de Sus village. The economic damage brought to Andrușul de Jos town hall is MDL 1,200,000.00 in compensation paid to citizens affected by the landslides. The adverse influence of landslides on human lives and on the activity of economic agents, and the damage caused to the environment, means that urgent intervention is required to stop the landslides occurring.

The investment is expected to be carried out in the village of Andrușul de Jos, with the main indicators for the geographical location of the entity being as follows:

- 19.5 km by land from the EU border (Romania).
- 185 km to Chisinau International Airport.
- Access to national road and railway networks.

 Constantin Leonti, mayor

Field of intervention	Measures against landslides on route L-668 from Andruşul de Jos village
Estimated value of the project	EUR 692,042
Co-financing capacity	10% of the project amount
Expected duration of the action	12 months

PROJECT OVERVIEW

PROJECT GOALS

- Ensuring unimpeded access to Andruşul de Jos village by renovating the road infrastructure, and ensuring the safety of the residents.

RELEVANCE OF THE PROJECT

- Free public access to the section of Route L-668 concerned, and to the entire route.
- Reducing the risk of landslides on the given portion.
- Ensuring unimpeded access to tourist areas.

MAIN DISCOUNTED RESULTS

- Ensuring unimpeded access to the villages of Andruşul de Jos and Andruşul de Sus, and stopping landslides.
- The population of the region, including economic agents and visitors, will have access to a safe route.

- Avoiding financial losses of the residents of the area and the APL.
- Increasing the degree of security of the inhabitants who are in close proximity to the surfaces affected by landslides.
- Increasing the incomes of the population and the well-being of families.
- Development of tourism and agro-tourism, which is an income generator.

ALIGNMENT WITH MAIN LOCAL, REGIONAL AND NATIONAL STRATEGIC DOCUMENTS

The project is aligned with the following main local, regional and national strategic documents:

1. Law No. 721/1996 regarding quality in construction.
2. Road Law 509/1995.

Promotion of Cultural-Ethnic-CULT traditions in Cahul district

Portfolio of Investment Opportunities

40

PROJECT BACKGROUND

In 2019, the development of cross-border cooperation with partners from the Lower Danube Euro-region was continued within the cross-border cooperation programme Romania–Republic of Moldova 2014–2020. The promotion of cultural traditions contributes to the development of the cultural tourism potential of the region and involves the implementation of modernization measures and the renovation of traditional tourist and cultural sights in the area. This includes the following: the development of a pottery workshop in the “Romantica” camp in the village of Moscow, which involves rehabilitating, furnishing and equipping the existing building; the development of the People’s Harbour Museum in the village of Colibași, which involves the reconstruction of the building; the development of the Weaving Workshop in the village of Văleni, which involves the capital reconstruction of the building; construction of a „Craftsmen” Summer Camp in the village of Văleni; and construction of a Traditional Moldavian House (house museum) in the village of Wormwood. The evaluation and exploitation of tourist heritage can contribute both to the general development of the district and to consolidation of the budgets of the localities within the district.

The investment is expected to be carried out in the municipality of Cahul, with the main indicators for the entity’s geographical location being as follows:

- 19.5 km by land from the EU border (Romania).
- 185 km from Chisinau International Airport.
- Access to national road and railway networks.

Potential for investment expansion	Attracting new investors through establishing public-private partnerships
Sustainable Development Goals pursued	<ul style="list-style-type: none"> Sustainable cities and communities. Partnerships for goals.

TECHNICAL DATA

Field of intervention	Promotion of cultural-ethnic-CULT traditions in Cahul district
Estimated value of the project	EUR 289,990
Co-financing capacity	10% of the project amount
Expected duration of the action	24 months

PROJECT OVERVIEW

PROJECT GOALS

- Capitalizing on and developing the cultural tourism potential of the region by implementing measures to modernize and renovate traditional cultural and tourist attractions in the area.

RELEVANCE OF THE PROJECT

- The promotion of cultural traditions will stimulate the development of several economic branches by training human resources to work in various fields of activity, using traditional tourist resources, and thereby contributing to the prosperity of localities in the region.

MAIN DISCOUNTED RESULTS

- The creation and consolidation of a cross-border tourism cluster in Cahul, Reni and Galați, which will stimulate the development of border tourism.
- Development of a network of cultural institutions, including museums, traditional households, workshops and creative camps.

- At least six investment decisions in this area, which will employ more than 25 people.
- Ensuring the population's continuous and sustainable access to quality cultural services, with the potential to expand the craft area.
- Widespread positive economic effects.
- Increased attractiveness of the area, which will improve the business environment.

ALIGNMENT WITH MAIN LOCAL, REGIONAL AND NATIONAL STRATEGIC DOCUMENTS

The project is aligned with the following main local, regional and national strategic documents:

- Socioeconomic development strategy of Colibași village 2020–2025.
- Cahul district is currently in the process of developing the district strategy, and the strategies of the other localities targeted by the project are in the process of being approved.

INFRASTRUCTURE

Development and arrangement of the “Salt Lake” Cahul rest and recreation area

PROJECT BACKGROUND

The municipality of Cahul has the status of a spa resort, being an area rich in springs with mineral waters, with a unique composition. According to their chemical composition, the waters of southern Moldova are extremely valuable, being rich in sulphur, iodine, bromine, hydrogen sulphide and sodium with low mineralization, they are widely used in the treatment of locomotor disorders, cardiovascular, dermatological, gynecological disorders, the system central and peripheral nervous, attributed to the category of “Matesa” mineral waters (Russia). The recreation area “Salt Lake” was developed in 1964, operating for 20 years, during which thousands of tourists, attracted by the lake’s mineral water, came for treatment. At the moment, the water supply of the “Salt Lake” is insufficient and is limited to an insignificant source of water, the supply channels with thermal mineral water containing sodium chloride and iodo-bromic sulfate, being destroyed, are blocked.

The investment is expected to be carried out in the municipality of Cahul, with the main indicators for the entity’s geographical location being as follows:

- 19.5 km by land from the EU border (Romania).
- 185 km from Chisinau International Airport.
- Access to national road and railway networks.

IMPACT

Population of the municipality	50 000 people
Number of direct beneficiaries	Approx. 2 million people
Potential for investment expansion	Attracting new investors through incorporation PPP
Sustainable Development Goals pursued	<ul style="list-style-type: none"> • Sustainable cities and communities; • Decent work and economic growth.

TECHNICAL DATA

Field of intervention	Development of balneo-climatic tourist leisure infrastructure.
Estimated value of the project	2 000 000 EUR
Co-financing capacity	10% of the project amount
Expected duration of the action	10 – 18 months

PROJECT OVERVIEW

PROJECT GOALS

- The development of tourist leisure infrastructure in the southern development region, in order to achieve sustainable and balanced economic growth in the region.

RELEVANCE OF THE PROJECT

The relevance of the Project „Development and arrangement of the recreation and recreation area Lacul Sărat Cahul” is expressed through:

- Valorization of mineral resources;
- Increasing the number of balneo-climatic tourist objectives in the Republic of Moldova;
- Capitalizing on the tourist potential of the Cahul region;
- Creating the conditions of rest and treatment for those who want it by means of mineral waters with a beneficial health composition.

MAIN DISCOUNTED RESULTS

- The utilization of approx. 11 m³/h mineral water;
- Increasing the degree of provision of the population with curative health services, respectively improving their health;
- Increasing the number of tourists attracted by the new tourism product that offers unique curative opportunities;

- Rehabilitation of the existing „Salt Lake” rest and recreation area, with the possibility of expanding the area;
- Increased attractiveness of the area for the business environment/investors;
- Creation of new jobs (approx. 54);
- The creation of a new public service of local and regional interest, on the right to use the underground sector for the extraction of curative mineral water of national importance;
- Increase in revenues in the local budget generated by balneo-climatic tourism;
- The creation of a new balneo-climatic objective in the Republic of Moldova.

ALIGNMENT WITH MAIN LOCAL, REGIONAL AND NATIONAL STRATEGIC DOCUMENTS

The project is aligned with the following main local, regional and national strategic documents:

1. The Vision, Strategic Development Directions and Action Plan of Cahul Municipality (2019-2025);
2. The Multiannual Capital Investment Plan of the municipality of Cahul, 2020-2025.
